

Installation

Caution: All devices connecting to bottom panel must meet all safety requirements.
There is no surge protection – Add surge protection to power supply, 10 amp max.
Keep product dry, well ventilated, free of dust and extreme heat.
Check power voltage and frequency prior to installation.
Clean with dry soft fabric.
All cable boxes should be installed by licensed installer.

Install

- Step 1. Cut hole in table top as per template provided.
Be sure to use correct template to match model of cable box.
- Step 2. Insert cable box through hole in table.
There is a 5mm flange on surface size of cable box to allow for correct fit to table.
- Step 3. Place fasteners on each short side of cable box and tighten. Use Philips screwdriver.
Tighten wing nut to secure bolt.
- Step 4. Connect cables.
