## M-TOUCH

## Cleaning

## M-Touch screen cleaning method:

Preparation

**Gloves:** No special requirements

**Cleaner:** Sprayway detergent, Model: 50 (recommended), Isopropyl based screen cleaner

Glass cleaning cloth: Anti-dust, lint-free or microfiber cloth

Method

**Step 1:** Turn the screen off and unplug the power cable. Don't just put the screen into sleep mode.

Step 2: Please wear gloves

**Step 3:** Shake up and down the glass cleaner, and spray on the cloth, never directly on the glass surface as there is a risk of moisture getting into the touch frame at the bottom of the screen

**Step 4:** Use a glass cleaning cloth to wipe the screen gently in the same direction, and then wipe the screen with dry cloth to remove any marks

## **Important notes:**

- Turn off the device before cleaning
- Do not use acidic corrosion solvent
- Do not use water
- When wipe the screen, please wipe gently along the same direction
