

A great performing Android™ tablet optimised for student response

Wordpad7
for Android™

A tablet especially designed for the classroom, including Google Play and Google Apps.

Includes Wordwall student response integration for 15 different response games including sketch brainstorm, buzzer and self-paced quiz, group sort, category brainstorm. Instant feedback of results via device.

Management interface for deploying apps and settings across multiple devices.

Includes DisplayNote collaboration licence so students can interact with the teachers' board, take notes and capture lessons.

With our WebAnywhere option, tablets can be used in schools without Wi-Fi. Our WebAnywhere Wi-Fi dongle allows tablets to access the Internet through the teachers' PC. The WebAnywhere browser allows you to control students' web experience by book marking and limiting access to particular sites.

Use the **Wordpad7** to involve everyone at once

The **Wordpad7 tablets** can be used to track pupil progress, facilitate discussion or play fast-paced learning games. Students of all personalities and abilities are able to engage, not just the usual suspects. You can access a range of classroom activities not available with the software alone.

Tablet comes pre-loaded with the Wordwall and DisplayNote apps!

Includes DisplayNote single user collaboration licence.

DisplayNote

All hardware purchases come with a perpetual **Wordwall** site licence, which can be installed throughout your school. No subscription is necessary, although if you wish to enable student response on other devices, the **Respond Everywhere** subscription is available at additional cost.
